

**JOB TITLE:** Analytics Summer Internship (2016)

Headquartered in Dublin, Ohio, Cardinal Health, Inc. (CAH) is a \$103 billion health care services company that improves the cost-effectiveness of health care. As the business behind health care, Cardinal Health helps pharmacies, hospitals, ambulatory surgery centers, clinical laboratories and physician offices focus on patient care while reducing costs, enhancing efficiency and improving quality. Cardinal Health is an essential link in the health care supply chain, providing pharmaceuticals and medical products and services to more than 100,000 locations each day and is also the industry-leading direct-to-home medical supplies distributor. The company is a leading manufacturer of medical and surgical products, including gloves, surgical apparel and fluid management products. In addition, the company operates the nation's largest network of radiopharmacies that dispense products to aid in the early diagnosis and treatment of disease. Ranked #26 on the Fortune 500, Cardinal Health employs nearly 35,000 people worldwide. More information about the company may be found at [www.cardinalhealth.com](http://www.cardinalhealth.com) and @CardinalHealth on Twitter.

**Location** – Dublin, Ohio

**Start Date** – May/June 2016

**Hours** – The summer program is a full-time internship, approximately 40 hours per week for approximately 10-12 weeks.

\*All Cardinal Health internships are paid internships.

The Summer Internship Program allows students the opportunity to work on meaningful and exciting projects that will give them the hands-on experience they need to build a solid foundation for their future. As an intern, students will have the opportunity to participate in a formalized program, designed to increase knowledge of Cardinal Health and the healthcare industry as well as develop essential leadership skills. Interns will be given the opportunity to explore different career paths and interview for full-time roles upon successful completion of the program.

**Why Choose the Cardinal Health Summer Internship Program?**

**Experience:** Interns work with other Cardinal Health professionals on their team, as well as business partners, customers and vendors on substantial projects in addition to daily work. To enhance leadership skills, each intern also participates on a planning committee. At the end of the summer, each intern has the opportunity to showcase their work in a presentation to business leaders.

**Networking:** Interns have the opportunity to learn from key business leaders through the “Executive Speaker Series.” They also have the opportunity to network with other professionals through both formal and informal networking events.

**Development:** Interns participate in a formal one-on-one mentoring program, as well as professional workshops to enhance their business acumen. They are also able to explore full time career paths throughout their internship experience.

**Camaraderie:** The internship program offers various social, teambuilding, community service events, as well as tours to help interns build a solid network of peers.

As an **Analytics intern**, you could potentially support the organization in several of the following ways:

- Integrate customer analytical views across sales, finance, operations, customer service, etc.
- Analyze and identify trends and establish opportunities for business impact
- Support business objectives and projects by developing and presenting analytical insights
- Develop, analyze and prepare reports to support strategic initiatives
- Create dynamic data visualizations to support data driven decision making
- Utilize advanced analytical methods to reduce costs or increase revenue
- Catalog, reconcile, and curate data and analytical processes to enable more effective insight generation
- Miscellaneous data and analytical requests to support agile business processes

**Accountabilities in this role:**

- Strong analytical skills and attention to detail
- Strong intellectual curiosity
- Strong quality and results orientation with a proactive approach
- Ability to interact effectively at all levels and across diverse cultures
- Ability to work independently with moderate level of direction
- Ability to prioritize requests effectively and understand importance and meet deadlines
- Must be willing to adapt to shifting requirements or priorities
- Knowledge of analytical tools are a plus, but not required (SQL, SAS, R, Tableau, Qlikview, Datameer)

**Program requirements:**

Cardinal Health primarily recruits current, full-time students who meet the following criteria:

- Bachelor's in any analytical, data science or quantitative degree or a related field
- Recommended GPA of 3.0 or above on a 4.0 scale
- Relevant coursework and/or projects
- Previous internship experience preferred, but not required
- Strong leadership, communication and analytical skills
- Established work ethic and ambition
- Extensive community service and/or extracurricular activities
- Process and results orientation
- Must be authorized to work in the United States; Cardinal Health will not sponsor students for work visas or other employment authorization

\*\*If you are offered a position and you accept that position, the offer is contingent upon the satisfactory completion of a drug test, completion of a background investigation, and demonstrated evidence that you are eligible to work for any employer in the United States.

All applications will be reviewed and the most qualified candidates will be contacted for an interview. In order to be considered, students must visit Cardinal Health's website ([www.cardinalhealth.com/college](http://www.cardinalhealth.com/college)) and apply for the Summer Internship Program.
